

## **NO MORE "QUEEN FOR A DAY"**

**Derrick Dufresne  
Community Resource Alliance**

This presentation will focus on the importance of action. People with disabilities have been waiting for us to get beyond our obstacles and rationale for playing it safe.

Participants will be challenged to take a stand and develop strategies to assist individuals with disabilities in developing opportunities to:

- get a job
- make friends
- have new experiences
- develop competencies

Strategies and implications of these approaches will be explored.

## **THE VISIONING PROCESS FOR PEOPLE WITH DUAL DIAGNOSIS: BEYOND THE WALLS OF FLESH**

This process challenges participants to come together to envision a future for a person with disabilities based on individual wants and needs.

Participants will be challenged to remember that we are planning for an individual and not the system. The focus is on what should be and must be in place, not what is currently available.

Specific processes and approaches to implementing visioning will be explored.
